Hi, I am team leader at Ericsson working with the verification of 5G radios. I graduated from Umeå Universiy last spring and wrote my master thesis about chatbot interaction together with SEB.

When I am not working I spend time with friends and family. I find that the best way to clear my head is to go for a run in the woods.

My friends would describe me as an active and social person who always has time for a chat and never says no to trying something new.
